CATERING TO STUDENT DIVERSITY

Advance Learners Publication

Publication serves the important purpose of letting the work or ideas known to others. Publishing a paper is an important parameter and evidence of one's awareness, knowledge, thought - process on the subject. A published paper becomes part of professional identity and helps distinguish from other academicians. This academic year we at SKPC took an initiative to provide a platform to the advance learners of all the departments by publishing their research papers. 28 students published papers in language, 30 in Commerce, 31 in Science and 22 in Arts & Management.

This offers the advance learners an opportunity to participate in a 'professional' process. It enables students to meet deadlines, organize, collaborate, and demonstrate responsibility, in addition to making them feel confident about their work and how to showcase it.

FACULTY EMPOWERMENT STRATEGIES

The present scenario demands high quality teaching and learning from the teachers. Teachers have to process a great deal of knowledge and skills with regard to both teaching and assessment practices in order to meet those demands and standards of quality education. Teacher learning is a continuous process that promote teachers' teaching skills, master new knowledge, develop new proficiency which in turn, help improve students' learning. Hence the teachers' enhance their competency by presenting and publishing research paper, attending workshops, seminars etc.

Conclusion

Martin Luthur King Jr said, "The function of education is to teach one to think intensively and to think critically. Intelligence plus character – that is the goal of true education".

Education exposes people to new thoughts and ideas and provides necessary skills and for a successful career, one needs knowledge, confidence, academic and technical skills, career opportunities and social skills.

We at SKPC believe in empowering women and bringing them together in an environment that helps to nurture their educational and professional curiosities. The SKPCIANS learn to read, reflect, explore, listen, argue, and especially, stretch their known boundaries. We unleash their potential and make them realize that they are like a magic wand which brings prosperity, health and pride to the family, society and nation.

I conclude with the words of Dr. **APJ Abdul Kalam**,

“Thinking should become your capital asset, no matter whatever ups and downs you come across in your life.”

With the blessings of Goddess Vasavambha, We at SKPC ‘DREAM’ and believe in ourselves and Yes, with robust mindset dare to reach the pinnacle and make the institution a Centre of Excellence in the days to come.

This report is attributed to the dedication, devotion and commitment of SKPC Management, Staff and Students.

Thank You for giving me this opportunity.....

Jai Hind!
